

Lockshield Radiator Valve

Fast and easy to install radiator valve and tamperproof Lockshield cap

Overview

Speedfit Lockshield Radiator Valve is used to switch off a radiator for installation or maintenance and can be used to balance radiators in the system so that they all heat up at the same rate.

The fitting is quicker and easier to install in confined spaces than traditional methods as it eliminates the need for hot works or tools.

Features & Benefits

- Lockshield radiator valve with tamperproof cap
- Fast and simple tool-free connection
- Safe flame-free installation, with no hot works, glue or flux
- Grip & Seal collet with stainless steel teeth and main O-Ring seal
- Suitable for use with JG Speedfit PEX and polybutylene barrier pipe (inserts required) and copper pipe
- Suitable for central heating systems

Product code	Description	Size	Pack QTY
JGRAD15	Lockshield Radiator Valve	15mm	1

Working parameters & specifications

Application	Usual working temperature °C	Maximum working temperature °C	Maximum working pressure, bar
Central Heating	82	95, short term malfunction at 114	3

Materials

Body	DZR Brass Chrome Plated
O-Ring	Ethylene Polypropylene Diene Monomer (EPDM)
Collet	Glass Filled Nylon
Collet Teeth	Stainless Steel 301
