

Strain Relief Boot

Flexible strain relief boot prevents damage by limiting the bend radius of the pipework

Overview

John Guest strain relief boot reduces the potential of strain on LLDPE or soft metal pipe/tubing.

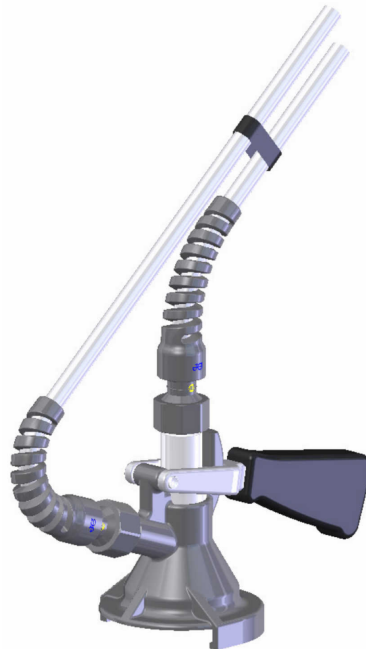

Manufactured in a ultra flexible rubber, the boot limits the bend radius of the tube preventing damage caused by kinking or snagging. All John Guest fittings are manufactured and assembled in the UK.

Features & Benefits

- Flexible rubber construction
- Easily slides over imperial sized LLDPE or soft metal tubing

Product code	Description	Size
