

Floor Panels

Fixes and secures underfloor heating pipework using plastic floor tiles

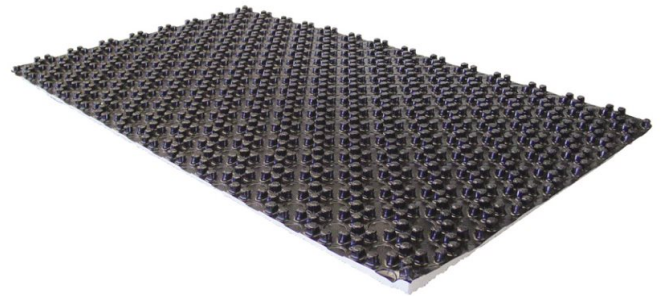

Overview

JG Underfloor Floor Panel is an underfloor heating (UFH) pipe fixing system that provides high heat output and response. Suitable for 15mm pipe, it uses a simple grid system to ensure precise layout to enable minimum pipe bending radius. Ideal for new builds and extensions with a screed floor construction, especially ground floor levels.

Fast and simple to install, it comes with a 11mm layer of insulation along with additional thermal insulation.

Features & benefits

- Screed pipe fixing system
- Simple castellated grid system for precise pipe layout
- Enables minimum pipe bending radius
- 11mm layer of insulation and additional thermal insulation
- High heat output and response
- Ideal for larger regular shaped rooms
- Suitable for underfloor heating applications only

Product code	Description	Size	Pack QTY
JGUFHTILE	JG Underfloor Floor Panel	1400 x 800mm	12

Floor Panels

Working parameters & specifications

Pipe Size Compatibility	15mm
Maximum working temperature	60°C
Recommended working temperature	50°C

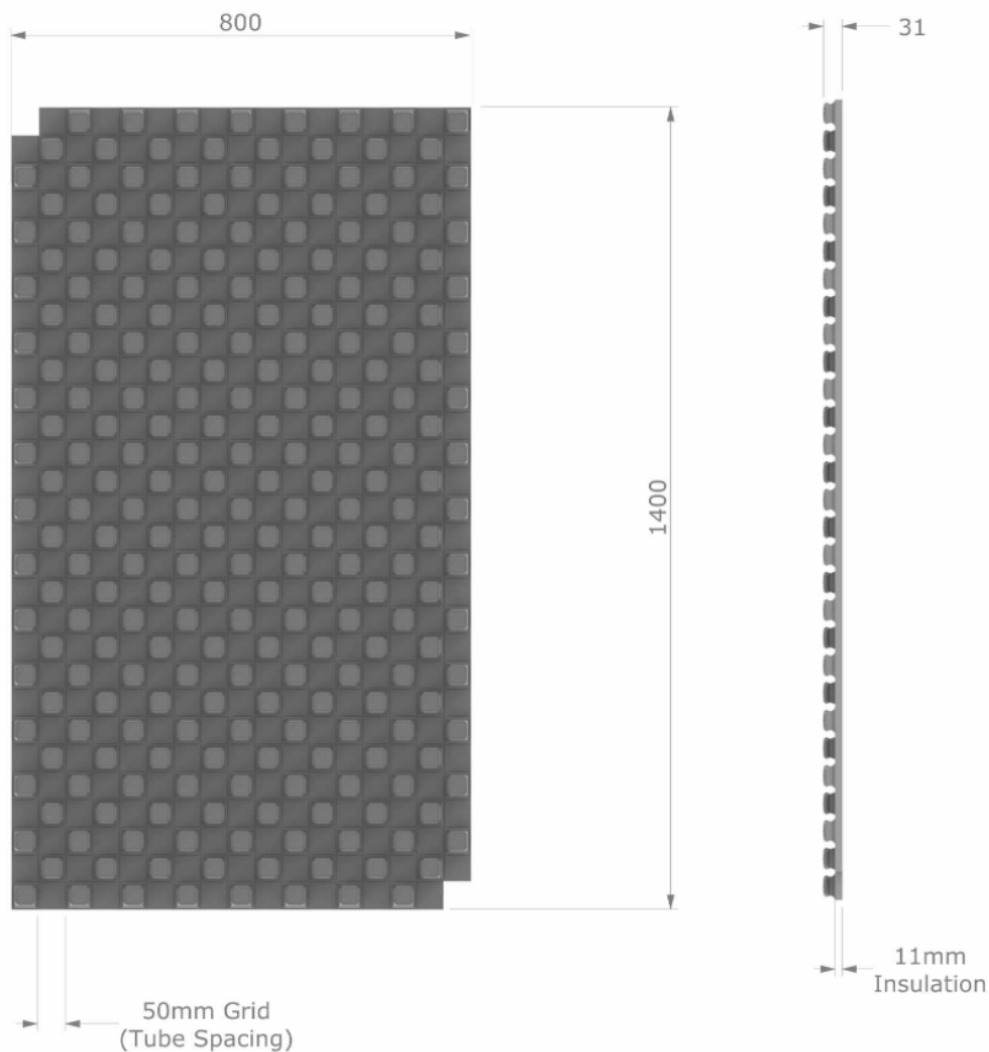

Applications

Underfloor Heating

Materials

Tile	Polystyrene
