**Specification**

Power source: 1.5V LR6*AA  
Temperature setting range: 5~35°C  
Display accuracy: 0.1°C  
Setting accuracy: 0.5°C  
Storage temperature: -10~60°C, 0~90%RH  
Ambient temperature: 0~50°C, 0~80%RH  
Wireless frequency: Lora 868MHz

**Note:**  
For connecting to the internet you must use the John Guest Gateway - JGWAY1.
Important safety information

Read all of the information in this manual before installing this thermostat.

Always turn off the power at the main power source by unscrewing the fuse, or switching the circuit breaker to the off position before installing, removing, cleaning, or servicing this thermostat.

Only a professional contractor should install this thermostat.

All wiring must conform to local and national building and electrical codes and regulations.

If the system is not operating properly, check the wiring and replace the fuse if necessary.

Use this thermostat only as described in this manual.
Thermostat display

15 Back home mode
16 Wake up
17 Temperature setting/Boost display
18 Weeks icon
19 Room temperature/time display
**ON/OFF function**
Press ‘➕’ to turn the thermostat ON. Press and hold ‘➕’ again to turn the thermostat OFF.

**Key lock function**
In the main display interface, press and hold ‘▼’ ‘▲’ at the same time to activate or cancel the key lock. When activated, no keys can be used. The thermostat will display ‘🔒’.

**Boost function**
Press ‘➕’ to switch the setting temperature or boost control. When the display shows ‘➕’ , press ‘▼’ ‘▲’ to select boost. The length of time the heating will be boosted is displayed. When the time elapses the screen returns to the temperature display.
Press ‘➕’ to cancel and go back to the temperature display setting.

**Holiday mode**
With the power on, press ‘≡’ to switch between manual mode, programming mode and holiday mode. After selected holiday mode ‘≡’ will display and will run at 16°C. Press ‘≡’ to cancel holiday mode.
Boost function can be used during holiday period.
Open window function
If the room temperature drops 6°C in 4 minutes, the open window function will activate and display ‘[ ]’, then turn down all heating. When the room temperature increases by 2°C the thermostat will return to normal operation. Press any button to cancel the open window function while it is active.

Anti-seize function
If the thermostat has not been activated for over 1 week then to prevent the valve and pump from seizing, the thermostat will run the system for 5 minutes.

Frost protection
In frost protection mode, when the temperature drops below what has been selected, the thermostat will start the heating until the temperature has been raised by 3°C.

Intelligent function
The intelligent function adjusts the starting time for home heating according to the temperature measured within the building. It preheats your rooms to the temperature according to your schedule.
Time setting

Press and hold ‘♀’ for 4 seconds, press ‘♀’ to select year, month, day, time scale, time, press ‘∨’ ‘∧’ to adjust setting, press ‘♀’ to confirm.
If there are no actions for 10 seconds, the thermostat will return to temperature display mode.
Press ‘♀’ to check time, year, month, day.

Setting the date and time on initial start up
Plug in the power supply. Press ‘∨’ or ‘∧’ to set year, press ‘♀’ to set month, day, time scale, time, press ‘∨’ ‘∧’ to adjust the setting.
Programme setting

Programme settings: 4/6 period programming optional (factory default: 6 period).
When the thermostat is on, press and hold ‘≡’ to enter the programming mode. Press ‘▼’ or ‘▲’ to select the programming week (5+2, 5+1+1 or 7 individual day optional).
Press ‘≡’ to enter time setting mode. Press ‘▼’ or ‘▲’ to select time, press ‘≡’ to enter temperature setting mode, Press ‘▼’ or ‘▲’ to select temperature. Press ‘≡’ to save and exit. If no buttons are pushed for 10 seconds, the thermostat will exit the programme setting automatically.

In programming state, press and hold ‘▼’ ‘▲’ at the same time to restore factory settings, display ‘\(\text{REF}\)’
Operation mode

Programming mode (The factory default is programmable)
The thermostat will run according to the pre-set schedule. The screen will show ‘⏰’

Manual mode
From programming operation mode, press ‘≡’ to enter the manual mode, the screen will display ‘’. Press ‘↑’ or ‘↓’ to immediately adjust the temperature and save automatically.

Temporary hold mode
The thermostat will keep the room at the temporary set temperature, and will resume the programme operation mode when you enter the next programme. In programming operation mode, press ‘↑’ or ‘↓’ to enter the temporary hold mode, the screen display ‘’. Press ‘↑’ or ‘↓’ to immediately adjust the temperature and save automatically.

</table>
**Pairing**

**Connecting the thermostat and wiring centre**

1. With the thermostat power off, press and hold the on/off button for 4 seconds to enter pairing mode (display should show “rfi”).

2. Press the on/off button again to send a signal to the wiring centre (display should show “- -”)

3. On the Wiring Centre, press and hold the pairing button for 3 seconds to enter pairing mode

4. Use the Wiring Centre pairing button to select the desired zone, indicated by the LED

5. Leave the wiring centre for 3 seconds. The LED should flash to indicate it is pairing to the thermostat

6. Once paired, the wiring centre LED will move to the next available zone. Press and hold the pairing button once again to exit the pairing mode

7. The thermostat is now connected to the chosen zone
When thermostat is in pairing status, press and hold button 3 seconds, light is on.
Installation

1. Separate the front and back parts of the thermostat
2. Attach the backplate to the wall with suitable fixings
3. Insert the batteries
4. Clip the front part to the backplate
Configuration menu

With the thermostat turned off, press and hold ‘≡’ to enter the configuration menu. Press ‘≡’ to select different parameters. Press ‘↑’ ‘↓’ to adjust parameters. Press and hold ‘≡’ for 3 seconds, display ‘DEF’, indicates all the configuration settings have reverted to factory default setting. The thermostat will return to ‘OFF’ mode if no buttons are pushed within 10 seconds.

Gateway specification

Adapter output: 5V → 1A
Working temperature: -10°C~55°C
Working humidity: 10%-90% (no condensation)
Wifi frequency: 2.4G Wi-Fi
Wireless frequency: Lora 868MHz
Dimensions: 60.5 × 60.5 × 16.1mm
Connecting the App

Download and register
Click App store (click Android application market)
Search for ‘JG Underfloor’ and download
Login

When you finish the registration, log into your email and click on the link to activate your account. Your APP is now ready to use.

Registered mailbox/phone number

Insert your password
Connecting to the Gateway

Tips: First, please turn on the location of your phone. Press and hold the reset key of gateway until the light turns red and blinks.

1. Enter the ‘HOME’ interface of the app, click the ‘+’ on the top right.

2. Click ‘Wireless thermostat’.
3. Enter your Wi-Fi account and password. Click ‘Next’

4. Tick ‘Confirm and proceed’, then click ‘Next’ (Follow instructions to reset device)

5. Adding device...

6. Click ‘Done’, it means the gateway has been added successfully

Tips
Before pairing the gateway, you need to power on the gateway. When pairing a gateway, the mobile phone and the gateway must connect to the same network.
Add thermostat

Before adding the thermostat, press and hold ‘\+Hr’ for 3 seconds, press ‘\+’ ‘\+’ to select ‘\+HF2’, then press ‘\+Hr’ to enter code match status and it will display ‘\+ –’ then then follow these steps to connect the app.
1 Click ‘+’ Add subdevice

2 Adding device...

3 Added successfully. Click ‘Done’.
Temporary leaving mode: If you are away from home temporarily, click the ‘Away’ button, the temperature will remain at 16°C, the energy-saving icon ‘.fs’ turns green and is on. After you arrive at home, click the button again to recover the previous temperature setting.

Press ‘^’, ‘v’ to adjust temperature

Slide to power on/power off
APP Setting-programming

Click the ‘ Program ’ to enter the programming mode

Click the ‘ History ’ for checking the historical temperature records

Click the ‘ Esc set ’ for setting specific parameters
APP Setting-Multi-day Programming

1. Click the ‘Program’ to enter the programming mode
2. Slide up and down to select the time, press ‘^’ ‘v’ to set temperature in different periods of time
3. Click ‘Submit’ to confirm

Click ‘Confirm’ after selecting the date
Optional Parameter Setting

- Anti seize: on
- Frost protection: off
- Open Window Function: off
- Key lock: off
- Automatic acquisition time: on
- Temperature calibration: 0°C

Slide up and down to select different optional parameters.
Remove devices

Click the icon ‘🔍’

Click ‘Remove Device’
Voice command

After waking up the speaker you can say:

Amazon Alexa
* Alexa, turn on bedroom.
* Alexa, turn off bedroom.
* Alexa, raise the bedroom by 1 degree.
* Alexa, drop the bedroom by 1 degree.
* Alexa, set the bedroom to 16 degrees.

Google Assistant
* Ok, Google, turn on bedroom.
* Ok, Google, turn off bedroom.
* Ok, Google, set the bedroom to 16 degrees.

Tips:
Bedroom is the device name. You can name it during the device set up. The temperature graduations and format must be the same in the speaker and the thermostat.
