

Actuator Valve

Opens a manifold heating circuit remotely via a thermostat

Overview

JG Underfloor 240v Actuator Valve opens or closes the flow of water to an individual underfloor heating (UFH) circuit on the manifold and is controlled by a thermostat or programmer.

It also allows for independent pipe loop control via the thermostat when wired to a JG Aura wiring centre.

Features & benefits

- 240v circuit actuator valve
- Indicator shows that the zone is in use
- Suitable for underfloor heating applications only

Product code	Description	Pack QTY
JGUFHA(240V)/2	240v Circuit Actuator Valve	1

Working parameters & specifications

Type	Thermal Actuator Head
Mode of function	2-position,, spring return at no voltage
Supply Voltage	240V
Connection Size	M30 X 1.5
Cable Size	2 x 0.5mm

Applications

Underfloor Heating

Typical Installation
